

Asset Construction (VAT-800)

Rugged Asset Tracking for Harsh Environments

IoT Tracker + Global eSIM + Platform

Advantages

Rugged & Long Lifecycle

-  IK10 impact protection
-  IP67 / IP69 sealed housing
-  15,000+ tracking events (-20°C to 70°C operating range)
-  Flexible installation

Efficient Global Connectivity

-  NB-IoT / LTE-M coverage
-  Deep indoor penetration
-  Built-in Vodafone eSIM
-  Configurable tracking intervals

Certified for Global Deployment

Compliant with EU RED, IEC 62368, IEC 62133, RoHS and GCF

Application

Construction

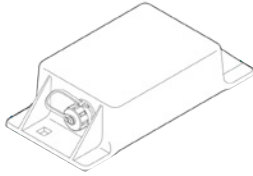

Logistics

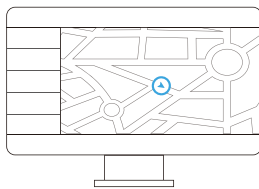

Rental & Leasing

Ownership Options Designed for Business Flexibility

Asset Construction

Platform

Purchase

For organizations executing long-term asset strategy.

- Full asset ownership and control
- Optimized for long-term capital planning
- Best suited for stable, scaled deployments

Rental (1~3 Year)

More flexible and lower upfront risk.

- Lower initial capital commitment
- Flexible budget planning
- Pilot deployment before large-scale rollout

Unified Device + Platform Ecosystem

Video Tracking

White Label

Cost Effective

Easy Customizable
